# NewTom RX DC X-VS X-VS E PERFECT.VISION

RX DC X-RAY UNIT AND INTRAORAL SENSORS

Cone Beam 3D Imaging  
**NewTom**  
what's next

# RX DC INTRAORAL X-RAY UNIT.

Outstanding quality  
and innovation,  
exceptional features.

RX DC efficiency stems from a combination of advanced technology and an outstanding capacity to produce high definition images. The RX DC X-ray unit provides top-flight performance, practicality and technology. The RX DC features a constant potential high frequency (DC) generator and a very small focal spot (0.4 mm) capable of providing sharp, detailed images while ensuring working comfort and low doses for the patient.

Higher performance with RX DC, the X-ray unit that combines high definition imaging, ergonomic design and low X-ray doses.

## SUPERIOR DIAGNOSTIC QUALITY

Obtained in just a few simple steps, all images are high resolution.

## ADVANCED TECHNOLOGY

The NewTom RX DC high-frequency X-ray unit is based on NewTom's know-how with a 30 cm source distance and 0.4 mm focal spot.

## MINIMAL RADIATION DOSE

Thanks to rectangular collimation and the ECO Mode parameters, the patient exposure to X-rays is minimal.

## VERSATILE AND EASY TO INSTALL

Easy, fast installation with multiple positioning options. NewTom RX DC is available in both a wall-mounted and a trolley-mounted version.

# PRECISION DIAGNOSTICS.

## Immediate diagnosis, excellent results.

Focal spot 0.4 mm and power 70 kV, 8 mA, high-frequency constant potential generator. Cutting-edge technology for extremely detailed images. The RX DC is extremely reliable: constant-potential design ensures image generation is unaffected by power fluctuations.

## USER-FRIENDLY CONTROL

A practical, user-friendly handheld unit, designed for immediate, precise X-ray image acquisition, allows easy selection of the most suitable programme. Moreover, it allows users to control the exact emitted dose and the tube temperature via the sequential exposure graph. A wi-fi version is also available.

## SUPERIOR PERFORMANCE AND TOP-CLASS ERGONOMICS.

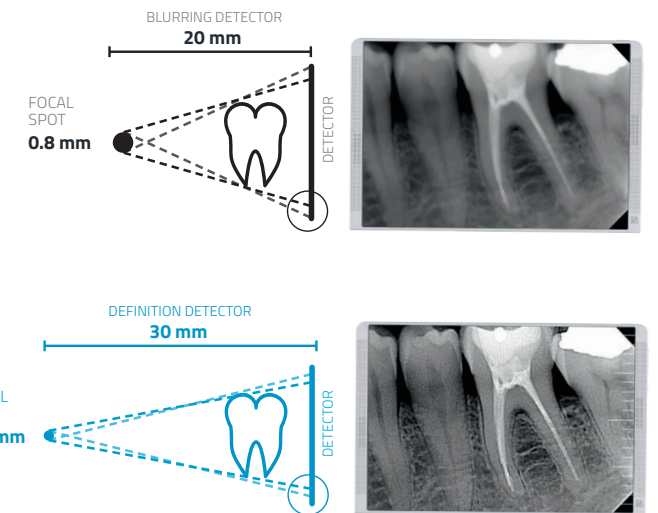

Thanks to the protractor with graduated scale, positioning of the arms and the head is stable, effective and fully adaptable to your work. Consists of extruded aluminium arms with an integrated self-balancing system - available in the following lengths: 40 cm (15.7") - 60 cm (23.6") - 90 cm (35.4"). The adjustable wall support ensures maximum installation versatility.

Increased X-ray parallelism and an incorporated collimator allow the RX DC to achieve a source-to-skin gap of 30 cm. The RX DC provides pin-sharp, precise images with outstanding detail.

Extremely practical and versatile, RX DC can be used together with any type of direct or indirect digital sensor and X-ray film. Featuring 28 levels of sensitivity, it ensures sharp images in any situation.

The RX DC unit can also be set up with shutters and an (optional) rectangular collimator to define the body area that will be exposed and so reduce the received dose. Maximum attention to staff and patient health, while ensuring sharp, high definition image quality.

**TROLLEY-MOUNTED VERSION**  
Maximised mobility for NewTom RX DC: a practical trolley allows the X-ray unit to be moved anywhere in the surgery.

# X-VS INTRAORAL SENSOR.

For high quality  
low dose dental  
diagnostics.

Innovative ergonomics, direct USB plug-and-play connection, high definition and immediate results make the X-VS with HR technology the most advanced and suitable sensor for your surgery. Simplicity of use and image acquisition - combined with advanced real-time digital technology - improve quality of work.

The latest generation of X-VS image processing software aims to improve diagnostic efficacy. With excellent image resolution and an intuitive software interface, X-VS makes reading images easier and better suited to the purpose. This translates into a comfort zone personalized for each professional and for each appointment.

## MULTI-VISION DIAGNOSTICS

High definition image acquisition in a few simple steps with filters optimised for every clinical need.

## HR PLUG & PLAY DIGITAL TECHNOLOGY

FOP multilayer sensor, sturdy and reliable with direct USB connection.

## OPTIMAL ERGONOMICS

Rounded profiles and ergonomic design to adapt to the oral cavity. Maximised active area ensuring an extended view.

## INTEGRATED IMAGE MANAGEMENT

The NNT software manages, processes and shares the acquired images on PC; also visible on iPad\*\*.

## CUSTOMISED DIAGNOSTICS

Available in two sizes for maximum adaptability to the dimensions of the patient's oral cavity. Excellent working comfort and positioning, ensured by ergonomic sensors with rounded corners. A set of innovative filters allows customised tests to be carried out to improve the diagnostic vision.

**WATERPROOF**  
WITH IP 67 PROTECTION RATING

# RELIABLE AND ERGONOMIC.

## Multivision for real-time quality diagnosis.

The X-VS intraoral sensor offers extraordinary performance, practical ergonomics and high technology, offering a perfect balance between comfort and cutting-edge technology. X-VS is impact-resistant, dust-resistant, IP67 certified (water-resistant) and can be used with all X-ray systems.

X-VS means real-time diagnostics, direct USB plug-and-play connection, high definition and immediate results. X-VS uses iRYS, the all-in-one software ideal for diagnostics, communication and management of intraoral imaging: perfect for storing, managing and printing images in perfect synchronism with any other devices already in the surgery.

## INNOVATIVE ERGONOMICS

Ergonomic design, rounded corners and a flexible lead make the X-VS a practical, ergonomic and intelligent sensor. This speeds up the work and makes it more practical, maximising patient comfort. Designed to adapt perfectly to the anatomy of the oral cavity, X-VS maximises both the active area and positioning comfort. Ergonomic positioners ensure optimal sensor placement.

X-VS maintains a perfect combination of first-rate comfort and cutting-edge technology. Patient comfort is ensured by ergonomics and automatic acquisition, helping real-time diagnostics: it also allows the dentist/assistant to be always next to the patient for an uninterrupted workflow.

With X-VS the captured images are immediately displayed. Quick and easy sharing, communication and storage for an optimised workflow. Following acquisition, images are loaded directly onto the PC. From here they can be consulted, printed and shared via the iPad App\*\* or a free image viewer.

## NEWTOM ADAPTIVE MULTIVISION

The innovative NewTom **ApT** (Adaptive Picture Treatment) filters have been specially developed to meet the needs of professionals. Thanks to proprietary algorithms optimized for the X-VS sensor, this function allows users to simultaneously acquire, display and share a set of images (up to 5), each with a specific improvement useful for highlighting anatomical details with different levels of sharpness. Equipped with the powerful NNT software, X-VS now allows more advanced and versatile image processing filters to be used in **Adaptive MultiVision** mode. You can select which filters to use from pre-set families or define customised ones based on individual diagnostic or visual preferences. This enhances diagnostic efficiency.

## MULTILAYER SENSOR

Four-layer sensor, Caesium Iodide scintillator with column-like micro-structures that preserve image quality; intercepts the X-ray beam and converts it into visible light. The Fibre Optics Plate collimates the radiation onto the sensor and protects it against X-ray penetration. The CMOS acquisition device and the electronics convert the light into a high definition digital image.

## X-VS E INTRAORAL SENSOR.

Sharper images  
with the same dose,  
greater patient  
comfort.

NewTom goes from strength to strength with the new X-VS E intraoral sensor.

Two different sizes ensure the best diagnostic results for both adults and children.

Thinner than previous sensors. X-ray dose remaining equal, greater sensitivity delivers more clearly defined images, illustrating details as small as coronal micro-fractures.

More comfortable for the patient and more liquid-resistant, the X-VS E sensor provides dentists with a valuable high-quality diagnostics tool.

### MORE SENSITIVE

Greater sensitivity combines sharper images and reliable diagnosis with low doses.

### MORE PRACTICAL

A longer cable makes daily tasks more flexible.

### THINNER

Just 4.5 mm thick, this sensor has clear benefits for both patients and workflows.

### MORE IMPERMEABLE

The IP 68 rating ensures ultra-high resistance to penetration by liquids or dust, whatever the context.

# HIGH PERFORMANCE WITH LOW EMISSIONS.

All the quality of  
NewTom imaging, for  
quick, clear diagnoses.

Compared to the other wire sensors in the range, the enhanced sensitivity of X-VS E delivers - X-ray dose remaining equal - images with higher contrast and detail.

In addition to patient safety, the slim design of the X-VS E ensures greater comfort during positioning across a wide range of exams.

The NNT software processes the images and, thanks to specific filters, can highlight areas and details of clinical interest.

## NEWTOM APT FILTERS

Like X-VS, X-VS E features NewTom Adaptive Multivision mode to provide you with up to 5 different images, optimized via NewTom ApT (Adaptive Picture Treatment) filters. This lets users observe different details according to clinical needs.

## EXTENSIVE ACTIVE AREA

Both sizes have a large active area that exploits almost the entire front part of the sensor, providing complete clinical images of the various anatomical structures.

## HIGH DEFINITION WITH SAME DOSE

With X-VS E, the same X-ray dose yields higher levels of contrast and sharpness, delivering more detail with which to detect common dental pathologies.

E Technology

Standard

## OUTSTANDING QUALITY EVEN WITH LOWER DOSES

Even with a lower dose, images are clearly legible down to the tiniest detail.

E Technology

Standard

## COMFORT

A mere 4.5 mm thick, X-VS E offers outstanding comfort. Together with the rounded corners and smooth edges, this makes it more comfortable because it occupies less space in the oral cavity and is easily positioned by the operator.

## SMOOTH OPERATING EFFICIENCY

The 3 metre long cable can reach the patient with ease, even in large practices. It guarantees fast, direct USB connectivity to the practice's PC or laptop without any need for additional control boxes. The cable also comes with a stabilizer to reduce energy consumption: consequently, it does not need to be placed on stand-by to prevent overheating, ensuring patient comfort at all times.

## POSITIONERS

X-VS E is supplied with special positioners to ensure proper execution of the various examination types.

TECHNICAL SPECIFICATIONS.

RX DC X-RAY UNIT

Generator	Constant potential, microprocessor-controlled
Working frequency	145 - 230 KHz with self-adjustment (typically 175 KHz)
Focal spot	0.4 mm (IEC 336)
Total filtration	2 mm @ 60 kV / 2 mm @ 65 kV / 2 mm @ 70 kV (*)
Anode current	4 / 8 mA
Voltage at X-ray tube	60 / 65 / 70 kV (*)
Exposure times	0.020 – 1.000 seconds, R'10 and R'20 scale
Source-skin distance	20 and 30 cm
Irradiated field	Ø 60 mm and Ø 55 mm (with round cone)
Additional collimators	35 x 45 mm (with rectangular cone for size 2 sensors)   31 x 41 mm and 22 x 35 mm, for size 1 and size 0 sensors
Power supply	50/60 Hz, 115-120Vac ±10% or 230-240Vac ±10%
Duty Cycle	Continuous operation with self-adjustment up to 1s/90s total
Arms (for Standard version only)	Available in 3 lengths: 40 cm (15.7") - 60 cm ( 23.6") - 90 cm (35.4")
Max. arm extension	230 cm, from wall
Versions	Standard (wall mounted) or Mobile (on portable cart)

(\*) values depend on the country where the product is marketed

X-VS SENSOR

SIZE 1 – STANDARD

SIZE 2 – LARGE

Outside dimensions (mm)	38.9 x 24.9	41.9 x 30.4
Thickness (mm)	5.3	5.7
Pixel matrix	1500 x 1000	1700 x 1300
Pixel size (µm)	20	20
Max. resolution (lp/mm)	25	25
Grey level depth	14 bit acquisition - 16.384 maximum levels of grey	
Scintillator technology	CsI (Caesium Iodide) with micro-columnar structure	
Direct exposure protection	FOP (Fibre Optic Plate)	
Degree of Case protection	IP 67 (Guaranteed against liquid or dust infiltration)	
Compatibility with X-ray generators	Any AC or DC technology X-ray generator with values in the 60 – 70 kV and 1-8 mA range and precision control of exposure times	

X-VS E SENSOR

SIZE 1

SIZE 2

External dimensions (mm)	36.8 x 25.4	41.9 x 30.4
Thickness (mm)	4.5	4.5
Pixel matrix	1500 x 1000	1800 x 1300
Pixel size (µm)	20	20
Max. resolution (lp/mm)	25	25
Grey level depth	16-bit acquisition - max. 65,535 grey levels	
Sensor technology	APS CMOS	
Scintillator technology	Direct deposition CsI (Caesium Iodide)	
Case protection rating	IP 68 (Guaranteed against liquid or dust infiltration)	
Compatibility with X-ray generators	Any AC or DC technology X-ray generator with values in the 60 – 70 kV and 1-8 mA range and precision control of exposure times	

X-VS | X-VS E MINIMUM SYSTEM REQUISITES

Supported operating systems	Microsoft® Windows® 10 Professional 64 bit
Processor	Intel Core 2 Duo / AMD Athlon X2 or later
RAM	4 GB (8GB recommended)
Graphics card	Discrete 3D Video Card or integrated GPU
Display settings	1280 x 1024; 1344 x 768 or greater, 16 million colours
Port	USB 2.0 or later versions
Power supply	5 VDC, 500 mA (via USB)

X-VS | X-VS E SOFTWARE REQUISITES

Connectivity	Direct USB to PC
Acquisition software (for PC)	iCapture with dedicated filters for third party software
Image management software (for PC)	NNT (compliant with ISDP®10003:2020 in accordance with EN ISO/IEC17065:2012 - certificate number 2019003109-2) and iPad NNT viewer App** (free)
Supported protocols	DICOM 3.0, TWAIN, VDDS
DICOM nodes	IHE compliant (Print; Storage Commitment, SR document; WorkList; MPPS; Query/Retrieve)
